

ORGANIZATION

Children and Young People Living For Peace, Nigeria
pledges to

End child labour in Nigeria

End child labour in Nigeria

Name:

Ending child labour in Nigeria

Description:

The process and plan of the pledge will be centred on online and offline advocacy programs to draw the attention of duty bearers and stakeholders in the industrial sector to make national policies that will protect the rights of children. The main beneficiaries are the children whose rights are being violated. The key problem we are trying to solve is to put an end to child labour in Nigeria. We will use our advocacy power through the use of social media channels to propagate our goals and vision of ending child labour in Nigeria.

Implementation plan:

Through online and offline campaigns, we will engage the mass media, grant interviews, and write articles on both online and offline media channels.

Impact:

Our action pledge will contribute immensely to ending child labour in Nigeria through our massive advocacy and sensitization campaigns that we will carry out both online and offline. These campaigns will draw the attention of the political office holders and captain of industries and drive them to make policies that will deter the engagement of children in industrial labour.
