

## ORGANIZATION

Dialogue Works (Terre des Hommes Germany, Kindernothilfe e.V.), Germany  
pledges to

**Amplify working children's voices**

## **Amplify working children's voices**

**Name:**

Amplify working children's voices

**Description:**

By the end of 2021, the Dialogue Works campaign will have supported the formation of 25 working children's advisory committees worldwide, which will implement their own advocacy dialogues to share their experiences, voice their needs and recommendations. The campaign thereby aims to create spaces for exchange between working children and political decision makers on local, national, regional and global level.

**Implementation plan:**

In close collaboration with over 20 partner organisations worldwide, we will support the formation of children's advisory committees (CACs) with the necessary tools, methodology and instruments. We will continuously provide guidance to partners and CACs on their way to their own advocacy actions, which will be implemented in the fall of 2021. We will cover the work by the CACs in blog articles on our website as well as on social media.

**Impact:**

Any political intervention that aims at eradicating exploitation and hazardous child labour will have a greater chance at succeeding if the voices of working children themselves were taken into account. By enhancing efficiency and legitimacy, participation contributes to political decisions that will find acceptance within society, and therefore facilitate their implementation.
