Homes of Hope, Fiji
pledges to

Combat sex trafficking

Combat sex trafficking

Name:

HoH is chairing a CSO National Taskforce to combat sex trafficking. We have developed "SETA" (Sexual Exploitation and Trafficking Awareness) - 3 tool kits that teach on a) the global issues of THB, b) national/regional issues of THB, and c) how to identify victims. HoH is limited in reach and capacity, but the collective reach of 19 CSOs and their own target populations is substantial. We are also working with these CSOs to develop referral pathways.

Description:

1. Conduct weekly Zoom trainings to CSOs on issues surrounding THB and CSEC;
2. conduct district and national level trainings with CSOs regarding sexual exploitation and trafficking awareness;
3. conduct a national training on how to deliver the HoH tool kits on sexual exploitation and trafficking

Implementation plan:

The CSO National Taskforce to Combat THB is being designed to be a model that can be followed regionally. Through shared resources, collective data collection, referral pathways, and knowledge sharing - a significant impact on the ground will be implemented. CSEC and trafficking will be uncovered, particularly in the rural areas where there is little knowledge and patriarchy and the culture of silence is still strong.

Impact:

Homes of Hope is the responsible Chair for the task force, consisting of 19 CSO organizations based nationwide.
