

## ORGANIZATION

ICHILD - International Children Rights Ambassadors Association, Turkey  
pledges to

**Develop solution suggestions for  
preventing and raising awareness on  
child labor in Turkey**

## **Develop solution suggestions for preventing and raising awareness on child labor in Turkey**

### **Name:**

Developing Solution Suggestions for Preventing Child Labor in Turkey and Raising Awareness on Child Labour

### **Description:**

Our main beneficiaries are actually children. Then adults are also indirect beneficiaries. We will hold a workshop where we will talk about the causes of Child Labor in Turkey and develop solutions to combat child labor. We will share the workshop outputs in 3 different languages. (TR, Arabic, EN) In addition, we will produce digital content using the hcd method to raise awareness on child labor with a team of 48 people.

### **Implementation plan:**

Children will be the main beneficiaries of our 2021 action plan. We think it will be helpful to get to the root of a problem before solving it. For this reason, we will hold informative sessions on Child Labor in legal and socio-political terms. At the same time, we will produce digital content to raise awareness on child labor by using the HCD method with young people. Then we will hold a workshop. We will share the outputs of this workshop with the public in three different languages (TR, ARBC, EN). The issue we want to solve in the long term is to eliminate child labor. But the first step to this is to identify problems, needs, and demands. We will do this together with the children.

### **Impact:**

Our main goal is to create awareness in individuals and to make the problem visible. Making the problem visible will bring a solution. Presenting the solutions of the children to the relevant authorities will be an important step we will take. In the sessions to be held, individuals of age will gain knowledge on data on child labor, legal regulations, and socio-political approaches.

In the workshop to be held afterward, child labor will be discussed and solutions will be put forward to end child labor.

With the digital contents and workshop outputs produced, public awareness will be created and the main problem will be made more visible.

When the problem becomes visible, the solution will come with it. Steps will be taken to eliminate child labor with innovative solutions.
