

GOVERNMENT

The Ministry of Labour, Employment and Social Security of the Nation, Argentina
pledges to

Strengthen territorial policy

Strengthen territorial policy

Name:

Strengthening territorial policy.

Description:

To reach out to the most remote sectors of Argentina to jointly strengthen our development policy to eradicate child labour at the decentralized, provincial and municipal level, strengthening the Provincial Councils for the Eradication of Child Labour (COPRETI).

Implementation plan:

- Implementation of the Federal Strengthening Programme for the Eradication of Child Labour
- Implementation of the National Programme for Strengthening COPRETI
- Implementation of phase II of the Child Labour Risk Identification Model (MIRTI)

Impact:

Phase II of the MIRTI will provide more complete and up-to-date knowledge of the situation in the territory, allowing a more adequate design of public policies and improved intervention. The implementation of the Federal Strengthening Programme for the Eradication of Child Labour will ensure more trained human resources are made available throughout the country to carry out the actions necessary to prevent and eradicate child labour. The implementation of the National Programme for Strengthening COPRETI will supply provinces with action plans and detection protocols.
