pledges to

**Sustainably transform Nazaret schools as a
source of inspiration and support**

Sustainably transform Nazaret schools as a source of inspiration and support

Name:

Sustainable transformation of Nazaret schools as a source of inspiration and support

Description:

In collaboration with Nazaret Cuida, we will seek to achieve the sustainable transformation of schools in a visionary, innovative and supportive way. This in itself is a call to collaborative action involving all key actors directly or indirectly related to our schools, putting children and young students at the centre stage to be actors of change. The starting point of the Sustainable Transformation Model "Nazaret CUIDA" is the 2030 Agenda and the 17 Sustainable Development Goals (SDGs), promulgated by the United Nations (UN), adapted to the beliefs, needs and challenges of the Nazaret Congregation.

The model is structured around four key pillars: a Sustainable Organizational Culture of the schools; a Sustainable Educational Programme providing students with crosscutting competences directly related to the challenges posed by sustainability; Sustainable Physical Spaces and Environment taking into account the specific features of each local community where the schools are located; and Sustainable Financing to implement the projects and measures relating to these pillars.

Thanks to the development of NATIVES, as a 2.0 evolution of Nazaret Cuida, any school in the world can join the movement to empower our young people to change the world.

Implementation plan:

Nazaret Cuida will grow from 60 SDG-related projects in 2020 to at least 150 among the 37 Nazareth schools in 2021.

Natives will be implemented in 40 schools in the first phase, with a view to reaching 200 schools by 2021.

Nechi - Nazareth will carry out joint work for training, dissemination and implementation of projects in schools, starting with a training phase for teachers and then involving students. All activities include human rights and equality issues, with a special emphasis on the protection of minors.

Impact:

By developing the transformative activity, the Nechi-Nazaret collaborative team hopes to increase the empowerment of children and young people, build the capacity of the network of educators and agents involved, and provide tools to prevent child labour at all levels. The team hopes to share its experience and knowledge with other educational institutions.
