GAKASSINAN YAN KASSA, NGO, NIGER

## **Reduction in child labour and people trafficking**

**Name:**

Reduction in child labour and people trafficking

**Description:**

This involves training for traditional chiefs and religious leaders on the fight against child labour. In turn, they will become stakeholders in the fight against child labour. We will thus achieve a significant reduction in child labour.

We intend to achieve our objectives through training for communities over two days by seasoned experts in the fight against child labour and child trafficking.

**Implementation plan:**

With the necessary funds to carry out the activities, we hope next year to see a substantial reduction or even the end of child labour and people trafficking.

**Impact:**

An African proverb says that fish rots from the head. By making traditional chiefs and religious leaders stakeholders in the fight against child labour, we are certain that this will achieve a significant reduction in child labour and people trafficking.
