**Eliminate child labour along the supply
chain in the Eastern Black Sea Region**

Eliminate child labour along the supply chain in the Eastern Black Sea Region

Name:

Elimination of Child Labour Along the Supply Chain in the Eastern Black Sea Region:
Awareness Raising and Mindfulness Studies

Description:

We plan to work with all our suppliers towards a long-term and sustainable future. Awareness training on eliminating child labour will be organized at all levels from the garden level to our supplier factories. Main beneficiaries are suppliers, farmers and seasonal agricultural workers. We aim to combat child labour throughout the supply chain and in seasonal agriculture, which is among the worst forms of child labour.

Our commitment until the end of 2021 is to inform at least 20 suppliers (Giresun, Samsun and Ordu provinces), including crushers and traders, 200 farmers (in Ordu province) and 200 seasonal agricultural worker families (Seasonal agricultural workers from Eastern and Southeastern provinces who migrated to Ordu to work) about child labour and to raise awareness on this issue.

Implementation plan:

Child labour awareness training will be organized for crushing factories and traders/ greengrocers in our supply chain. Subsequently, audits will be carried out with our own inspection program for all companies that we supply hazelnuts. If non-compliance is found as a result of these, we will work with our suppliers and contribute to their social programs.

Awareness training on child labour will be organized for our farmers and seasonal agricultural workers who come to work in their gardens. Internal inspections will be conducted with farmers.

Impact:

We aim at raising awareness of suppliers, farmers and workers on the subject.
