**Increase awareness in preventing
child labour**

UNDP TURKEY CO, TURKEY

Increase awareness in preventing child labour

Name:

Increasing Awareness in Preventing Child Labour

Description:

We will include sessions on child labour in our training/capacity development programmes for farmers.

Implementation plan:

We are implementing regional and agricultural & rural development projects with our partners in several regions/provinces of Turkey. During the capacity development and awareness-raising programs and training sessions for farmers, we will include modules in the prevention of child labour. By joining the training programs, the farmers will learn about the negative socio-economic results of child labour.

Impact:

It will increase the awareness level and inform the farmers of the negative socio-economic effects of child labour.
