

## ORGANIZATION

FUTURE, Cameroon  
pledges to

**Build the capacity of farmers and buyers  
by promoting the awareness  
and due diligence of child labour  
along the cocoa supply chain**

FUTURE, CAMEROON

## **Build the capacity of farmers and buyers by promoting the awareness and due diligence of child labour along the cocoa supply chain**

### **Name:**

Sensitization against Child Labour

### **Description:**

Future Cameroon is already carrying out sensitization at the level of farmers' households and communities. We are working in rural communities with cocoa farmers because in our rural communities many children are exposed to dangerous and hard work. Because most farmers are not aware, they keep endangering the lives of children and destroying the hope and future of the cocoa beans. Future plans and is already building the capacity of farmers via training and awareness campaigns . Making use of charts and cartoon images to be inclusive in attraction.

Our goal is to achieve 100% community sensitization in the areas where we work and hence zero child labour.

### **Implementation plan:**

Identifying all vulnerable communities, recruiting volunteers train and then install them to carry out household survey, which will assess and highlight the major dangerous work children carry out. According to the outcomes, we will conduct the follow-up and control.

### **Impact:**

Educating and capacity build
