Karsan Automotive, Turkey
pledges to

Action Commitments for the Year of Elimination of Child Labour

Action Commitments for the Year of Elimination of Child Labour

Name:

Action Commitments for the Year of Elimination of Child Labour

Description:

Child labour that deprives children of education and exploits them is not allowed in our company and our stakeholders. As KARSAN, we undertake to guide in taking the necessary measures to prevent child labour, to develop constructive cooperation with relevant organizations, and to do our part.

Implementation plan:

With the aim of eliminating Child Labor and ensuring the continuity of this process, we initiated activities to encourage the participation of vocational high school graduates in employment. In order to contribute to vocational education in the automotive sector, we signed a "Cooperation Protocol in Vocational and Technical Education" with Bursa Governor's Office and Bursa Provincial Directorate of National Education in 2020.

Impact:

Karsan Electric Vehicles Technology Laboratory is the first laboratory in the country to train students on electric vehicles.

Our students, who will have the opportunity to carry out their vocational training and internship practices in the real production area at KARSAN, will find employment priority at Karsan after completing their education life.

Students who will study and graduate at Karsan Electric Vehicles Technology Laboratory will be individuals who will create added value for the sector and new technologies in the future.
