

## GOVERNMENT

Child Protection Unit, Colombian Police Force  
pledges

to

**End child labour through  
concrete action and training**

## Ending child labour through concrete action and training

**Name:**

Ending child labour through concrete action and training

**Description:**

The Child and Adolescent Protection Groups will carry out prevention activities by disseminating advocacy and awareness raising materials through various media, including social media, schools, parks, squares and markets, among others. In order to strengthen protection at home, we will carry out risk mitigation in areas prioritised by each unit where the rights of children and adolescents are known to be at risk due to child labour. We will also hold a virtual conference for all Child and Adolescent Protection Units throughout the country together with the Labour Protection Sub-Directorate of the Ministry of Labour to explain the legal framework behind child labour.

**Implementation plan:**

- Carry out prevention activities through the "Open Your Eyes" programme as well as regular inspection and control activities.
- Provide training for all Child and Adolescent Protection Units with the support of the Ministry of Labour oner a disposición del Ministerio de Trabajo through virtual conferences.

**Impact:**

We will raise awareness and inform the community of child labour and ways to prevent it through the "Open Your Eyes" Programme as well as continuing to mitigate the risk of child labour through inspections and checks.
